

Project Executable Files

Date	28 September 2026
Team ID	SWTID-2026-2311
Project Name	AI StudyBuddy API
Maximum Marks	2 Marks

Project Executable Files - Submission Checklist

Item	Status	Location / Notes
Source code (backend)	✓ Included	GitHub repository - https://github.com/sachinselva038-nm/studybuddy_selva
package.json / dependencies	✓ Included	Express.js, Mongoose, bcryptjs, jsonwebtoken, cors, dotenv, multer, @google/generative-ai, nodemon (dev), express-async-errors
Environment configuration	✓ Included (as .env.example)	PORT , MONGO_URI , JWT_ACCESS_SECRET , JWT_REFRESH_SECRET , GEMINI_API_KEY , CLIENT_URL - actual .env excluded via .gitignore
API test collection	✓ Included	Postman / Thunder Client collection covering auth, materials and AI-generation endpoints
Final demonstration video	✓ Included	Demo recording (Google Drive)

Actual Project Folder Tree

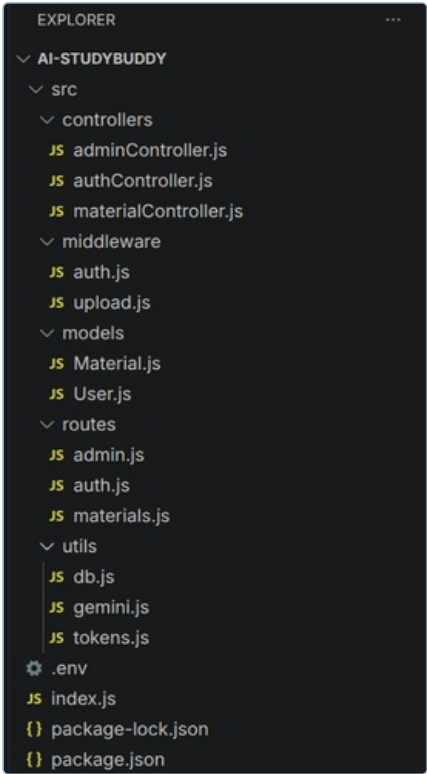

Fig. 1 – Real folder tree (VS Code Explorer)

Deployment & Access Details

Setting	Value
Database	MongoDB Atlas (managed cloud cluster, connected via MONGO_URI)
Server Port	5000 (process.env.PORT 5000)
Run command	npm install then npm run dev (nodemon) or npm start
Base URL (local)	http://localhost:5000/api
Demo Test Accounts	Name: selva · Email: sachin@gmail.com · Role: student Name: bharathi · Email: bharu@gmail.com · Role: student

Known Issues

- The four AI-generation endpoints (summary, flashcards, quiz, study plan) depend on live Google Gemini API latency, which is expected external-service behavior rather than a defect (see Performance Testing).
- Only .txt , .md and .pdf files up to 5 MB are accepted for upload in this cycle; other formats (e.g. .docx) are rejected by the upload.js file filter.
